

OGDEN

3-POINT FLEXIBLE HARROW LIFT

Suitable for:

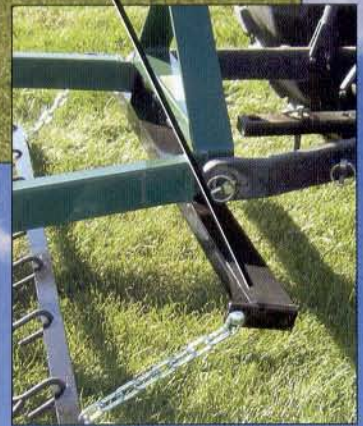

- Lawns & Gardens
- Golf Courses
- Parks
- Sports Fields
- Horse & Race tracks

SHOWN LN 6'8" (ALSO AVAILABLE IN WIDTHS OF 10', 12', AND 14').

Ogden Features and Benefits

- Ideal with small horsepower lawn & garden tractors for ease of transport
- Easy to set up & disconnect for storage
- Chain link mounting keeps your harrow working with maximum flexibility
- Even on smaller power units, unique design keeps center of gravity close to tractor and your front wheels on the ground
- For Category I and II 3-point hitch tractors

OPTIONAL DRAWBAR

LIFT POSITION

Fax: (217) 582-2746

Chain Harrows cover the ground better than any other type available. In addition to a maximum number of tillage points (120 per 4' width), the flexible design of the Harrow lets the unit hug ground contours regardless of terrain. The Harrow can be reversed for aggressive action pulled one way, or lighter action the other.
